

**PHILIPS**

CarePoint

6.0 central monitoring  
software

# Technical specifications

The new Philips CarePoint 6.0 central monitoring software is the foundation of your CarePoint resident safety system.

Using wireless technologies strategically placed throughout the community, **the CarePoint 6.0 central monitoring software** receives, processes and identifies alerts throughout the community, including advanced fall management and controlled access and wander management. CarePoint 6.0 software is the data-driven link among several

other Philips technologies that are designed to meet the individual and enterprise-wide needs of executives at senior living communities. And although these technologies deliver tremendous value by virtue of their sophistication, they also feature true ease of use for community staff and management.

## Features & benefits
