Call cord stations with reset button

Traditional and dependable solution for bedside emergency calls

Lifeline 900 MHz wireless nurse call cords are designed to be used with EchoStream® and Inovonics backbones for bedside emergency calls and patient requests. Used in a community setting, help requests from connected call cords are processed by the CarePoint resident safety system, which receives alerts and notifies supervising staff – helping you build a better community experience.

Features and benefits

Local reset button allows staff to acknowledge alarm calls at source

Removable 10-foot call cord features momentary push button

Supervised wireless transmitter provides notifications for service needs or battery replacement

LED Indicator on enclosure that illuminates for 10 seconds when activated and reset

Easy to clean plastic pull cord and membrane switch

Long-life 3.6 volt lithium battery delivers up to five years of battery life

UL 2560 certified
