## Personal help buttons

### Encourage constant wear for continuous protection

Lifeline 319MHz and 900MHz personal help buttons are lightweight and waterproof personal help devices. They can be worn by residents as a pendant with an adjustable neck cord or as a wristband with a soft, elastic strap. As an essential part of CarePoint resident safety systems, these help buttons provide maximum comfort and flexibility to encourage consistent wear by residents – helping you build a better community experience.

### Features and benefits

**Comfortable, waterproof design** encourages constant wear and continuous protection

---

**Bright LED** indicates that a help call has been sent

---

**Special button design** reduces accidental activations

---

**Supervised device** provides notification for servicing or low-battery condition

---

**Elastic wristband or adjustable lanyard with breakaway feature**

helps to improve comfort and safety

---
