# CarePoint 6.2

## Central Monitoring Software

The foundation of your resident safety system

The CarePoint central monitoring software plays a crucial role in helping to provide protection to your residents. The CarePoint Management Console receives, processes and identifies alert data throughout the community from devices such as personal help buttons, smoke detectors, check-in devices or controlled access doors. When the system receives an alert from a wearable device, wireless receivers throughout the community help determine a residents' call location and staff are promptly notified either by pagers and/or the CarePoint Notifier mobile app.

### Features and benefits

**Connected data system** helps protect residents

**Integrated alerts** for comprehensive monitoring indoors and out

**Wireless network** to provide call coverage over an entire campus

**Real-time monitoring** for improved staff management and resource utilization

**Email notifications** provide executive oversight with configurable zone escalation

**Modern, intuitive platform** on Apple® Mac mini® computer

**Integration with CarePoint Notifier app**

**Secure data retention** with automated local data backup

# Specifications

## CarePoint Management Console

Operates on an Apple® Mac mini® server

Networking requires commercial grade 802.11ac or 802.11n

Minimum received signal power requires at least -70dBm in all areas where devices are used

Dedicated SSID for network required

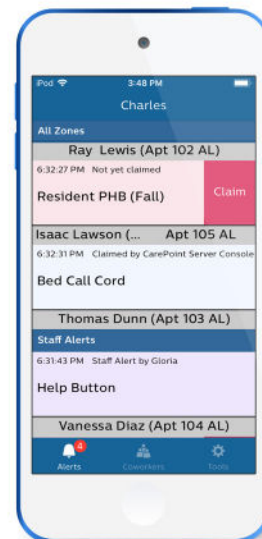

## CarePoint Notifier app

Operates with a Lifeline-supplied and tested CarePoint server running the CarePoint Console software

Requires a Wi-Fi network with full coverage throughout your community

Compatible with Apple® iPhone®, iPod® and iPad® version iOS 9 or higher\*

App download from Apple App Store®

CarePoint Notifier app

# Ordering information
