Alert Redundancy Processer

Reliability you can count on

The Alert Redundancy Processer (ARP) plays a critical role in the CarePoint Essential failover alert redundancy system. In the unlikely event of a internet outage, the ARP is designed to receive and process local alerts from fixed and wearable devices and send them to on-site caregivers through the paging system.

Features and benefits

Key component in fail-over alert redundancy system

Monitors network and component health

Receives and relays local alert data

Remote downloadable firmware

Can be placed on a shelf or be mounted on a wall

Specifications
