BlueHub gateway

Enables fail–over alert redundancy

The BlueHub gateway provides an access point to the CarePoint Essential resident safety system. In the event of a network outage, the BlueHub notifies the Alert Redundancy Processor to send local alerts to caregivers through a backup paging system.

Features and benefits

Constant cloud connectivity provides 24/7 real-time security and monitoring

Easy integration allows addition of third–party wireless devices

Plug–and–play installation gives added flexibility by allowing the BlueHub to be located anywhere with a power source and an internet connection

System status LEDs allow network health to be viewed at a glance
