CarePoint Essential Community Dashboard

A modern, digitized platform for your e-call system

The Community Dashboard is the cloud-based software component of the **CarePoint Essential** resident safety system – helping you build a better community experience. Available in both mobile and desktop applications, the Dashboard provides community operators with trend reporting, workflow automation, staff communications and a comprehensive view of traditional e-call devices throughout your community.

Features and benefits

Cloud-based system allows you to remotely monitor your community

User-friendly interface helps increase staff efficiency with workflow automation

Pivot reports show trends in help requests, falls and staff response times

Electronic Health Records integration automatically synchronizes resident profiles

Help requests and automatic fall alerts are processed and escalated to staff

Comprehensive resident profiles and event logs

Works on Android and iOS devices
