Resident check-in buttons

Fixed location for reliable resident check-in

Lifeline resident check-in buttons are a vital part of Lifeline CarePoint resident safety systems – helping you build a better community experience. Available for use with either Lifeline or EchoStream® backbones, these active wireless devices signal the central monitoring station – enabling reporting for residents who have – and haven't yet – checked in.

Features and benefits

Large button area and label enables ease of activation

Membrane switch cleans easily

Replaceable battery delivers up to three years of battery life

Wireless supervised transmitter alerts for battery replacement or service needs

UL2560 certified
